

Test- and management software

- safety and function tester control
- management of devices, inspection management, customer management
- scheduling of test activities
- DDE-link for controlling out of Microsoft application
- user specific printing with form generator
- test examples included especially for Excel users

Technical Data

ACTIMED is a test- and management software for medical and industrial usage. It has been designed for in-house usage and mobile usage at your costumers (e.g. hospitals).

ACTIMED provides the creation, execution and management of test procedures with devices from S.P.L. Elektronik. You can control devices from other manufactures as long they are compatible with the communication gateway.

ACTIMED is based on GMEP and ACTIMED 1.0.
